

Learning Objective
To classify animals.

Success Criteria

Self-Assessment

- *Know that a taxonomist is a scientist that classifies animals.*
- *Sort and group animal based on their features.*
- *Give reasons for classifying animals.*

Zoo Classification

You have been asked to classify the animals on the Zoo Animals List. The animals will be housed in enclosures near to each other. Start by deciding on two groups to use to split up the animals, then split each group into two more groups. Carry on until you have classified the individual animals, or cannot think of a way to split the group up any more. The first few boxes have been drawn for you. Add a title for each group to show your reasons for classifying the animals in this way.
